

Industrial Safety and Firefighting

The Offshore Safety and Survival Centre (OSSC) offers entry-level training as well as specialist emergency response training, firefighting and special skills training to experienced firefighters. The OSSC also provides a wide range of safety courses to industry.

The OSSC is able to deliver training at one of its well-equipped facilities in St. John's or Stephenville or deliver training directly in your community or industry location.

The OSSC is able to deliver courses to Canadian and international standards or can design courses to meet your particular needs.

Training Courses

The OSSC delivers a full spectrum of standard courses to industry and land based emergency response organizations meeting Canadian and international standards in the following areas:

- Personal Safety
- Structural Firefighting
- Marine Firefighting
- Aviation Firefighting
- Emergency Organization and Response
- Emergency Team Training
- Environmental Response
- Medical incident Response
- Rescue Team Training

The OSSC can design courses to meet your particular needs or specific environmental or legislative requirements in your area of operations.

Accreditation

The OSSC is recognized as a training provider by the Newfoundland and Labrador Fire Commissioner's office. Courses delivered meet the requirements of the National Fire Prevention Association (NFPA), Transport Canada and the Newfoundland and Labrador Department of Human Resources, Labour and Employment, as applicable.

Further Information

For further information on our industrial safety and firefighting courses, please visit our Web site at www.mi.mun.ca/mi/ossc or contact our administration office at **709 778 0550 ext 225**.

Be ready for the challenge.
