

Offshore Petroleum Industry

General Capability

The Offshore Safety and Survival Centre (OSSC), located in convenient proximity to the extensive oil and gas deposits on Newfoundland and Labrador's Grand Banks, has grown to become Canada's largest provider of safety, survival and emergency response training to the Offshore Petroleum Industry.

The OSSC has particular expertise in training for operations in cold and harsh environments and, for this reason, has provided services to offshore petroleum projects in cold environment locations such as Sakhalin Island and the Northern Caspian Sea.

The OSSC is able to deliver training at its well-equipped facility in St. John's or on site at your location.

Training Courses

The OSSC delivers a full spectrum of standard courses to the Offshore Petroleum industry meeting Canadian and international standards in the following areas:

- Personal Safety Training
- Technical Safety Training
- Emergency Team Training
- Stand by Vessel Crew Training
- Environmental Response

The OSSC can design courses to meet your particular needs or specific environmental or legislative requirements in your area of operations.

Accreditation

The OSSC is recognized as a training provider by the Canadian Association of Petroleum Producers (CAPP). Courses delivered to the Offshore Petroleum industry are approved by the Canada Newfoundland and Canada Nova Scotia Offshore Petroleum Boards (CNOBP, CNsOPB), Petroleum Industry Training Services (PITS), the Sector Skills Council for the Oil and Gas Extraction, Chemicals, Manufacturing and Petroleum Industries (Cogent – OPITO), Transport Canada and the Newfoundland and Labrador Department of Human Resources, Labour and Employment, as applicable.

Further Information
