Graduate Student M.Sc. Position (Fisheries Science and Technology)

The Fisheries and Marine Institute of Memorial University is currently conducting a joint project with industry addressing changes in the Atlantic herring populations off western Newfoundland, Canada.

A fully funded M.Sc. student position (\$22,000/year) is available in the [Fisheries Science and Technology](#) program. The successful candidate will investigate the ecology and physiology of Atlantic herring in the Gulf of Saint Lawrence. The project will involve at-sea data and sample collection at various times of the year in several areas of the Gulf on board commercial fishing vessels. The project has the potential to involve both physiological data pertaining to age and fitness of spawning herring and hydroacoustic survey data. The project will involve facilities at the Marine Institute, Herring Science Council, and DFO.

The position will join two large applied research teams, the *Centre for Sustainable Aquatic Resources* and the *Centre for Fisheries Ecosystems Research*, both located at the Fisheries and Marine Institute, Memorial University, St. John's, Newfoundland and Labrador. **Start date is September 6, 2021.**

Supervision will be provided by:

[Dr. Scott Grant](#)

Depending on the student's interests, co-supervision will be provided by either:

[Dr. Maxime Geoffroy](#)

[Dr. Shannon Bayse](#)

Interested students should send their CV and (unofficial) transcripts to:

Meghan Donovan
