

Who We Are

Vale is a pioneering mining company that works with passion to discover and transform resources into the ingredients essential to people's daily lives. We are the world's largest producer of nickel and iron ore, and a leading producer of copper, cobalt and precious metals. Headquartered in Brazil, Vale is a truly global company, operating on five continents.

In Canada, Vale's primary business is nickel. In Newfoundland and Labrador, we currently operate an open pit mine and concentrator at Voisey's Bay and a nickel processing plant at Long Harbour. These operations are part of Vale's Base Metals business and are supported by the corporate office in Toronto, Ontario and offices in Happy Valley-Goose Bay and St. John's, Newfoundland and Labrador.

Our **Vale Newfoundland and Labrador Operations team** is currently seeking a:

SAFETY, HEALTH, & ENVIRONMENT NEW GRADUATE / STUDENT

The Opportunity:

Within the Safety, Health and Environment Department, the successful candidate will assist with a variety of tasks to ensure the Voisey's Bay Mine Site operates within Safe Work Procedures.

This is a fixed-term position which will be based in the Voisey's Bay Mine Site, on a two week on, two week off rotation until December 31, 2019 with possibility of extension.

Accountabilities:

- Ensure that project goals are achieved relating to the project permit requirements, project commitments, project changes and development/distribution/implementation of Vale NL Overall Safety, Health & Environment Execution Plan for Construction and Commissioning, including related project policies and procedures during the applicable phases of the project;
- Provide proactive health and safety leadership by example;
- Analyze health and safety data and review trending reports;
- Participate in workplace inspections and field audits;
- Participate in the development of SH&E Guidelines, Standards, Targets and Procedures and ensure they are effectively implemented;
- Support the SH&E Department in administrative duties;
- Other duties and activities as appropriate and necessary;

Education:

- Post-secondary Education in Safety, Health, and environment.
- Students who are currently enrolled in the program with relevant experience will also be considered.

Experience:

- A minimum of 1 year of related experience with a focus on Safety, Health, and Environment, preferably in an industrial setting.

Knowledge and Skills:

- Time management skills to perform multiple tasks simultaneously, safely, and efficiently.
- Strong organizational, interpersonal communication, analytical and problem solving skills and a proven safety record are essential.

Apply:
