

DFO EMPLOYMENT OPPORTUNITY

DFO is seeking a candidate with a background in spatial analyses, mapping and marine biology. The main tasks of the position (casual position) will be to complete video analyses of surveys conducted on aquaculture sites and map marine organisms (epifauna) presence and abundances. These analyses will be completed with the help and supervision of DFO staff, as well as Dr. Suzanne Dufour (Department of Biology, Memorial University). Data analyses and report writing will also be expected. The anticipated start date is November 1st with a casual position lasting up to March 31st.
