

Wood is currently recruiting a Piping Designer to work in our St. John's office on brownfield offshore oil and gas projects.

Responsibilities will include, but will not be limited to:

- Ensuring project schedules and client approved budgets are managed and met.
- Preparing detailed Cost, Time & Resource estimates based on client supplied work scopes.
- Ensure design, analysis and specifications are in accordance with applicable codes, governing statutory regulations, Wood procedures, offshore installation specific design philosophies and meet project objectives and industry best practice.
- Adhering to all HSEQ requirements within the Piping discipline in accordance with Wood procedures and management systems
- Originating and checking of documentation including but not limited to drawings, specifications, data sheets, SDRL's, and reports.
- Preparing BOM's and RFQ's for discipline equipment
- Travelling offshore as required for surveys and construction support

Candidates should possess the following qualifications:

- Technical diploma from a post-secondary institution
- 2+ years of experience in oil and gas industry
- Experience with PDMS or any 3D modeling software
- Any equivalent combination of experience and / or education from which comparable knowledge, skills and abilities have been achieved may also be considered
