ADVANCED DIPLOMAS & POSTGRADUATE CERTIFICATES

WHAT'S NEXT IN YOUR WORLD?

One year graduate options that build on a diploma or degree.
YOU’LL SOON BE CHOOSING YOUR FUTURE CAREER PATH.

There are a million paths you can take. So which way should you go?

Whatever you want to be and wherever you want to go, the Marine Institute can get you there. Explore our post-graduate programs and find the career path to a world of opportunities.

Welcome to the Marine Institute.

Located in St. John’s, Newfoundland and Labrador, Canada, we’re a world-leading centre for ocean-related career education and research.

As a campus of Memorial University of Newfoundland, the Institute is one of the largest institutes of its kind in Canada offering a suite of over 20 programs for the oceans, maritime and food sectors.

A cutting-edge education from Marine Institute is one of the most affordable in Canada and provides graduates with credentials that are recognized around the globe.

FOOD SAFETY

ADVANCED DIPLOMA

Work on the front line protecting the public from food-related safety issues.

PROGRAM DESCRIPTION

The program places an emphasis on the food quality assurance component of the industry. It’s designed to provide a strong technical education in food safety and food inspection. Courses feature a combination of lectures, workshops, practical sessions, guest lecturers and projects to hone practical and technical skills. A work term placement will provide invaluable practical experience to help a graduate become an asset to the industry.

PROGRAM OBJECTIVE

This program is designed to:

- Provide a strong technical education in the areas of food safety and food inspection.
- Prepare students for employment in the food industry and regulatory agencies.
- Develop technical and analytical skills in the food production industry.

ADMISSION

REQUIREMENTS

An appropriate Bachelor’s degree, three-year diploma of technology, or a combination of work experience and formal education acceptable to the Admissions Committee.

Completion of introductory university courses in biology and chemistry (or similar courses deemed acceptable).

HOW TO APPLY

To apply online, go to www.mun.ca/apply.

Applications acceptance is ongoing.

fail entry only. This program does not accept winter or spring semester applications.

PROGRAM STRUCTURE

THIS ONE-YEAR PROGRAM IS DIVIDED INTO THREE TERMS:

TERM 1

Students will be required to take courses in Applied Statistics, Food Microbiology, Food Hygiene & Food Safety, Food Safety and Sanitation and Food Chemistry.

TERM 2

The second term continues the study of food safety and includes such courses as Food Law, Foodborne Diseases, Food Inspection Techniques, Management Principles, and Food Toxicology. A technical project course allows for in depth study of an area of special interest.

TERM 3

Students will find placements in pertinent industries or agencies for practical experience.

* Taught 5 consecutive days after end of Semester.

PROGRAM DELIVERY

Courses are delivered on-campus using a range of teaching methods including lectures, tutorials, laboratories, seminars and study tours.
SUSTAINABLE AQUACULTURE

ADVANCED DIPLOMA
Train for a leading role in the global aquaculture industry.

PROGRAM DESCRIPTION
Aquaculture has been identified as an important economic priority for the Canadian and provincial governments. Currently, there’s a large demand for leaders and managers in the industry across Canada and around the world.

PROGRAM OBJECTIVE
This program is designed to provide students, from a wide range of academic disciplines, with the education, training and management level skills required to participate in aquaculture development.

The goals of this program are to provide students with:

- Education and training for employment in a wide variety of fish and shellfish culture vocations.
- Management level training needed to ensure the logical & sustainable development of aquaculture industries.

ADMISSION

REQUIREMENTS
An appropriate Bachelor’s degree, three-year diploma of technology, or a combination of work experience and formal education acceptable to the Admissions Committee.

HOW TO APPLY
To apply online, go to www.mil.mun.ca/apply. Applications acceptance is ongoing.
Fall entry only. This program does not accept winter or spring semester applications.

PROGRAM STRUCTURE

This one-year program is divided into three terms:

TERM 1
In addition to fish health, finfish, shellfish culture, practical facility maintenance and animal husbandry and site selection, students also receive training in business-related topics such as marketing and research proposal development. Study tours to local aquaculture sites are also included in the first semester as well as several practical field sessions.

TERM 2
Courses in finfish nutrition, statistics, business management, aquaculture & the environment, aquaculture engineering and handling and processing aquaculture products. During this semester, students also complete an in-depth, industry relevant research project designed to develop skills in experimental design, fish handling and aquaculture systems operations. Students also complete practical aquaculture courses which are designed to develop skills in net making, boat handling, seaman ship, and marine emergency duties.

TERM 3
A 13-week aquaculture work term. Students work on finfish and shellfish farms or within laboratories and support agencies. Linkages for work terms have been established in Canada, the United States, South America, Australia, Europe and on international development projects.

TERM 1 COURSES
- AQUA 4100 Aquaculture Seminar Series 1
- AQUA 4102 Shellfish Culture
- AQUA 4107 Finfish Culture
- AQUA 415A Site Selection
- AQUA 4112 Practical Facility Maintenance and Animal Husbandry
- BSMG 4103 Marketing Aquaculture Products
- SFTY 1101 WHIMS
- STAT 4103 Statistics
- TKPR 411A Technical Project
- WKT M 4000 Work Term Preparation Seminar

TERM 2 COURSES
- AQUA 4101 Handling & Processing Aquaculture Products
- AQUA 4103 Fish Health
- AQUA 4104 Fish Nutrition
- AQUA 4111 Aquaculture and the Environment
- AQUA 4113 Aquaculture Engineering
- AQUA 415B Site Selection
- BSMG 4104 Business Management
- TKPR 411B Technical Project
- AQUA 4114* Rope Work and Net Mending
- SFTY 1101* First Aid
- SFTY 1125* Small Vessel Operator Proficiency
- SFTY 1136* Small Non-Pleasure Domestic Basic Safety

* Delivered between Term 2 and 3.

PROGRAM DELIVERY
This program is delivered on campus using a combination of lectures, workshops, practical sessions on finfish and shellfish farms and field work. Faculty expertise is supplemented by guest lecturers from industry, government and aquaculture research institutions.
WATER QUALITY

ADVANCED DIPLOMA

Develop the skills and knowledge necessary for responsible utilization and treatment of water resources.

PROGRAM DESCRIPTION

This is the only post-graduate program of its kind in Atlantic Canada focusing on the study of water and wastewater. It consists of a balance of theory and practical applications through lectures, discussion seminars, case studies, laboratory, field trips and projects.

Students will be provided significant training in the technical aspects of water and wastewater treatment. An introduction to socio-economic and environmental factors, legislative policies, regulations, and the importance of protecting and managing water resources will also be emphasized. After completing the program, students will have the knowledge to treat, maintain and use our resources safely and in an eco-friendly way.

PROGRAM OBJECTIVE

Students receive significant training in the technical aspects of water and wastewater treatment. Students also complete specific courses in microbiology, chemistry, limnology, water and environmental policy, statistics and geographic information systems (GIS) and remote sensing that will enhance their understanding of the science behind water and wastewater treatment and management. Students are provided with an introduction to the socio-economic, environmental and legislative policies, regulations and the importance of protecting and managing water resources.

ADMISSION

REQUIREMENTS

An appropriate Bachelor’s degree, three-year diploma of technology, or a combination of work experience and formal education acceptable to the Admissions committee.

Completion of an introductory course in chemistry.

HOW TO APPLY

To apply online, go to www.mt.mun.ca/apply. Applications acceptance is ongoing.

Fall entry only. This program does not accept winter or spring semester applications.

PROGRAM STRUCTURE

This program is comprised of two thirteen (13) week academic terms, a six (6) week technical session and a thirteen (13) week work term.

The academic semester and technical session consist of a balance of theory and practical applications through lectures, discussion seminars, case studies, laboratory, field trips and an independent research project. The work term will involve students placed in pertinent industries or agencies for practical work experience.

QUALITY MANAGEMENT

POSTGRADUATE CERTIFICATE
Learn advanced management strategies that apply to any industry or sector.

PROGRAM DESCRIPTION
In this program students will learn specifics about quality management, project management, quality assurance and production management. Students will gain an understanding of important management principles and how they can be applied to their particular area of interest.

PROGRAM OBJECTIVE
This is a post-graduate-level program designed to provide an understanding of quality management practices and how they apply to a particular industry.

ADMISSION

REQUIREMENTS
A Bachelor’s degree, three-year diploma of technology, or a combination of work experience and formal education acceptable to the Admissions Committee.

HOW TO APPLY
To apply online, go to www.mun.ca/apply. Applications are received on a semester by semester basis.

PROGRAM STRUCTURE

THIS ONLINE PROGRAM CONSISTS OF FOUR COURSES: ONE CORE AND THREE ELECTIVES.

Learning online will allow students to interact with a virtual community consisting of other quality professionals and instructors.

REQUIRED COURSE
MIPG 4105  Quality Management

ELECTIVES COURSES

MIPG 4101  Technical Reporting for Quality Management
MIPG 4102  Food Safety Systems
MIPG 4103  Technical Problem Solving
MIPG 4104  Quality Assurance in the Food Industry

MIPG 4105  Introduction to Statistical Process Control
MIPG 4106  Project Management Fundamentals
MIPG 4108  ISO 9001 Management Systems

PROGRAM DELIVERY
The overall structure of the program is course-based with courses offered online by the Fisheries and Marine Institute of Memorial University. This is fully supported by Centre for Innovation in Teaching and Learning (CITL). Brightspace is used as the main content delivery method and provides a virtual classroom for each course in the program. Students can avail of all the services and support offered by the Marine Institute and Memorial University including access to the extensive University Library System resources and to Help Desk support available through CITL for technical issues related to Brightspace.
