## When the Going Gets Rough...

The skilled men and women of safety and emergency response get going. On land or at sea, in our cities or in our skies, these capable professionals meet the dangers of the modern work world head on. They respond. They take control. They manage the risk. Now you can be a part of this essential and exciting field. You can train at one of the country's newest centres for safety and emergency response training.

Located in Stephenville, Newfoundland and Labrador, the **Safety and Emergency Response Training (SERT) Centre** is a joint project of the Fisheries and Marine Institute of Memorial University and the Stephenville Airport Corporation. That means you get the maximum training advantage: proven experience in the delivery of industry programs and access to Canada's most modern aviation fire training facilities.

### Delivering Industry-driven Programs

From its fire training field – said to be one of the best in Canada for air crash training – to its aviation firefighting simulator, crash response vehicles and ample classroom

space, the SERT Centre is custom-designed to bring a new level of accredited training and recertification to industries throughout Atlantic Canada. Programs are systematically designed to meet the specific needs of client sectors, including governing regulations, volume, timing and type of coursework required.

It's training that fits... and training that works.

When things go wrong, the highly skilled professionals of safety and emergency response have to get it right. The SERT Centre helps make that happen. Experienced instructors provide the up-to-the-minute skills and certifications required by **the aviation, industrial, municipal, marine, oil and gas, and fish harvesting sectors**. These include:

- NFPA 1001 certified firefighting training (land-based and industrial)
- NFPA 1003 certified crash firefighting training
- Training on behalf of the Petroleum Industry Training Service (PITS)
- Certified Transport Canada training
- And many more

The reality of the modern work world is one of big risk: massive machinery, hazardous environments and potential human error.

Be ready for the challenge. Train at the Safety and Emergency Training Centre in Stephenville, Newfoundland and Labrador.

*Our well-equipped facility means you're ready for real-world risks.*

*Hazardous work environments mean potential danger. Ensure your team is industry-certified, with the skills they need to survive.*

*Be ready for the challenge.*
